## Overview

The DLCBP/6-1 PV Combiner Box (6 in 1 out, DC 500V/DC 1000V) is designed for safe and efficient DC power distribution in solar photovoltaic (PV) systems. In systems with string inverters, our AC combiner boxes provide optimal short-circuit and overvoltage protection. Customized solutions are available for different projects requirements. The AC combiner is a highly reliable device and should be used. \*6 String PV Combiner Box has 6 String for solar panel input which can has bigger capacity than 4 string combiner box. Support with Max 1080W in 12V system, 2160W in 24V, 4320W in 48V system. It integrates DC fuses, surge protective devices, and circuit breakers or disconnect switches, ensuring comprehensive protection for PV. In a photovoltaic system, the modules are arranged in strings and fields depending on the type of inverter used, the total power and the technical characteristics of the modules.
