

After-sales service for micro-module outdoor type

Overview

A complete after-sales service and support offering from automation specialists, ensuring your equipment maintains high and reliable performance. LightMax® markets the aerial micromodule cable for outdoor ducts, that combines two mounting systems; aerial and in duct for spans up to 60 m. Cable's concept allows time and costs savings by adapting to the type of mounting. The unique fiber excess length control method provides the cable with excellent mechanical and environmental properties. Whether you need a small-scale on-premise data center or a modular solution for rapid deployment, our expert construction and engineering services ensure. Application□ The micro-module data center is designed to deal with the changes of cloud computing, virtualization, centralization, high density and other servers, improve the operation efficiency of the data center, reduce energy consumption, and achieve rapid expansion without affecting each. Technical Support: Provide technical support for the installation, use, and maintenance of photovoltaic system products.
