

Albania IDC Micro-Module Data Center

Overview

The project, valued at approximately €100 million, will be developed within the Economic and Technological Development Area (TEDA) currently under construction in Kashar, west of Tirana, by the Municipality of Tirana. According to Israeli outlet Globes, the 4.5 acre facility will cost around €100 million (\$118m) with the potential to expand up to 100MW. It will be situated. Albania is set to enter a new era of digital infrastructure as Israeli company ADC prepares to build the first-ever data center in the country, marking a major milestone for Albania's technology, energy, and investment landscape. The facility will have an initial capacity of 32 megawatts, expandable to 100 megawatts, and aims to attract European and American. The project, which will be built in a free trade zone near the capital Tirana, will cost an estimated euro100 million. Pictured: Futuristic Data Center with.
