

# Case Study of Complete Distribution Box Project

## Overview

In early 2023, a leading automotive manufacturing plant in Germany embarked on a comprehensive automation upgrade to increase production efficiency and reduce downtime. The project involved installing over 200 new sensors, actuators, and control devices across three production. Milestone Projects partnered with technology services company CDW to automate their distribution centre, aiming to reduce over reliance on manual labour, improve order accuracy, and increase material throughput. The solution involved implementing an Automated Storage and Retrieval System (ASRS). summarized: Distribution Box Application in Industrial Automation Case Study: Implementing Advanced Distribution Solutions in Modern Manufacturing Facilities Project Overview This case study examines the implementation of our advanced distribution box system in a large-scale automotive manufacturing. Distribution management involves overseeing the movement of goods from supplier to customer. In this case study, we will explore how Walmart successfully implemented a cross-docking system. To begin, a summary of the overall process will help visualize the destination. This will help in understanding the path to get there. □ Where do we start?
