

Common Standard Distribution Box Dimensions

Overview

Box dimensions are always written in the same order: Length \times Width \times Height (L \times W \times H). This is the universal convention used by packaging suppliers, carriers, and retailers worldwide. For example, a box listed as 12 \times 9 \times 4 in is 12 inches long, 9 inches wide, and 4 inches high. Choosing the correct electrical box size is essential for safety, compliance, and proper installation. Whether you are shipping products to customers, displaying merchandise on retail shelves, or packing subscription boxes, this guide helps you determine the correct dimensions based on wire fill capacity, device requirements, and installation environment, ensuring a safe and efficient electrical system. Learn how to read catalog sizes, and how to choose the right enclosure size for your layout. It includes specifications for TOP-TS, TOP-TF, TOP-LS, TOP-PS, TOP-PF, and TOP-S distribution boxes that range from 1-way to 36-ways.
