

# Cost of High-Core-Count Optical Cables

## Overview

The number of fiber cores in an OPGW cable is a crucial determinant of its price. OPGW cables with more fiber cores cost more due to the additional materials and complexity. With 19+ years of experience installing fiber-optic cables at over 20,000 locations, we've seen how prices vary based on cable type, project scope, and installation complexity. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. For overseas shipments, freight (especially LCL) can contribute 5–15% of total landed cost. Compared to conventional optical cables, Sumitomo Electric can reduce costs by as much as 60% with FREEFORM Ribbon™ Technology. The small-diameter and high-density optical. Input costs for fiber optic cable are adding upward pressure on fiber optic cable prices at a time when demand for fiber technology is high and expected to continue growing. As market demands increase, so do the complexities involved in selecting the right cable for your needs. How can you navigate these. If you are just looking for the numbers to plug into your budget, here is the current market average (Ex-Factory Prices) we are seeing for bulk orders. ⚠ Note on Units: Prices below are primarily listed Per Meter.
