

# Export American-style electrical distribution box

## Overview

The American-style prefabricated box-type substation is a compact, fully integrated solution for 10kV-35kV power distribution. It features a tamper-proof, weatherproof steel enclosure with a classic aesthetic design. When global manufacturers and contractors source electrical enclosures for international projects—particularly those destined for North American markets—they encounter a fundamental design divergence: American-style electrical boxes versus standard industrial enclosures. These varied approaches are shaped by differing urban densities, environmental priorities, and cost considerations across regions. While American units prioritize. Choosing custom power distribution boxes from J&HW Group ensures cost efficiency through in-house production of components like sockets, wires, and casings. it is used in 3 phase AC 50Hz and rated current max 1600KVA transformer.
