HDPE and PVC conduits help stabilize the cable environment, reduce. Fiber comes in two main flavors: Single-mode (OS2) - Uses a very small core (9 microns) and transmits data over long distances, sometimes miles. The yellow jacket is. However, fiber optic cable is a high capacity transmission medium which can have its transmission characteristics degraded when subjected to excessive pulling force, sharp bends, and crushing forces. These losses may not be revealed until long after installation is complete. For these reasons extra. Placing Fiber Optic Cable in Underground Plant 1. In some applications, the innerduct may be lashed to an aerial strand.
