

Fiber optic broadband speeds are slow when connected to a Fast router

Overview

Restarting your router is one of the easiest ways to resolve minor internet speed issues. Often, these devices just need a fresh reboot to clear out temporary glitches and restore your connection to full speed. Wait for about 60 seconds to make sure it. For now, let's look at several factors that may be causing your speed to slow down. It may also struggle to support more than a. I was expecting dl speeds of 900+ on wired connection and 600+ on wifi when close to router, what I am getting is 100 (dl) on wired and max of 350mb on wifi when sitting on top of the router, other rooms in my apartment are getting 50-200~ on the wifi network. fizkes/Shutterstock Close unnecessary apps Before you begin investigating the reasons for your unstable connection, start by closing any unused software or apps on your computer. This is frustrating, especially with slow gaming or during streaming.
