

Fiber optic connection to router WAN port shows disconnection

Overview

If you do not have a modem and only a router with PON or ADSL port, try reconnecting the fiber optics or RJ-45 connector. Check the LED on both Internet and PON. Sometimes, a simple restart can fix the issue. I am having an issue where my router WAN connection light turns red randomly and I lose connection on wired and wireless devices. I have tried 2 different routers. A WAN outage can be caused by upstream connectivity, configuration errors, or a physical interface failure. Treating all WAN. Restarting the router, checking network cables, optimizing security settings, upgrading the modem, troubleshooting network adapters, and seeking help from a technician are important steps in fixing a WAN Connection Down issue. 86", "hostname": "CharlieNet", "system": "ARMv8 Processor rev 4", "model": "Belkin RT3200 (UBI)", "board_name": ". Two days ago I've upgraded firmware to the newest version (1.
