

# Fiber optic network card directly connected to fiber optic cable

## Overview

The fibre network card allows fast message passing to the network. Find single and dual port SFP+ adapters with reliable connectivity. The most common families: Key insight: Choosing the right NIC starts with understanding speed requirements and the optics or cabling ecosystem you already have. Fiber NICs can accept a variety of media. Fiber to Ethernet media converters adapt between a typical RJ-45 copper Ethernet cable and fiber-optic cable. This article will explore the requirements and steps necessary to achieve a direct fiber optic connection to your computer, as well as the benefits and potential challenges. The primary use of SFP network cards is their ability to provide different interface types, allowing connections over various distances and across different media types. They can operate at data rates from 100 Mbps up to 1 Gbps, which makes them perfect for all kinds of networks.
