

# Fiber optic router settings 300m

## Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. □ RESET: There are two ways to reset to the Router's factory defaults: 1. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. As far as I understand, I need a PPPoE username and password to connect. I never received it from Telekom, as well as Access number (Zugangsnummer). This ensures critical traffic. Lastly go to "Bandwidth Control Settings" => "Rule List" and create a rule per device (per IP), or if IPs are in a row you can just create a rule for the entire IP Range of the phones; the upload and download speed per each device need to be calculated and tuned based on the client's bandwidth. We. TP-Link's N300 Wireless GPON router XN020-G3 is a Gigabit Passive Optical Network (GPON) terminal, ideal for Fiber-to-the-Home solution, allowing users to access high-speed internet connection via the GPON port and devices to connect wirelessly at 300Mbps wireless 802.
