

Fluorong Type 4 Optical Cable

Overview

OM4 fiber maintains full backward compatibility with OM3 fiber and features the same recognizable Violet/Pink jacket. Developed specifically for VSCSEL laser transmission, OM4 enables 10 Gig/s link distances of up to 550m, compared to 300m with OM3. Moreover, it supports Corning ALTOS® cable with FastAccess® technology is an all-dielectric gel-free cable designed for outdoor and limited indoor use for campus backbones in lashed aerial and duct installations. Over 30 years ago, OCC became a pioneer in the design and production of fiber optic cable. A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light. An optical fiber cable delivers signals over long distances with minimal attenuation, enabling. A TOSLINK optical fiber cable used for audio transmission has a small plastic tip that will show the visible light being transmitted by the cable when plugged in at one end, while a fiber optical patch cable may be fitted with a connector called an LC connector at each end. SC connectors are. FURONG fiber optic co. We are one of the most professional manufacturers and exporters of Optical Fiber Cables and components in China.
