

Industrial-grade switches with wide temperature range

Overview

RTD-based switches cover -200°C to 600°C , suitable for laboratories, food processing, and process industries. Danfoss temperature switches are electromechanical controls which provide a volt free switch contact which will operate at the set temperature, thus providing a simple ON /OFF control. They provide continuous uptime, manageability, and operational efficiency. With flexible PoE options of IEEE 802.3bt. H3C Industrial Ethernet 4320 switch series is H3C's latest industrial Ethernet switches designed for rugged environment and wide operating temperature. In contrast, industrial Ethernet switches typically support a much wider operating temperature range, commonly -40°C to 85°C (-40°F to 185°F). Managed, unmanaged and Power-over-Ethernet (PoE) IP20- and IP67-rated Industrial Ethernet Switches are robust and versatile, helping enable industrial automation and monitoring in challenging conditions subject to extreme temperatures, dust and moisture.
