

Inquiry about ODF patch panel 12 cores

Overview

Compact 12-core fiber optic patch panel for FTTH & telecom networks. Features 2U height, Corning-compatible fibers, and modular splice trays. ODF (Optical Distribution Frame) patch panels are designed to provide a high density 19" rack-mountable solution for next-generation fiber networks, it is used as terminal equipment of fiber optical cable for fiber patching, fixation, splicing and management. Set of fiber fusion, storage and fiber optic cable connection in one multi-functional ODF, which can be both management breakout cable, but also to manage the ribbon cable. Large space of inside ODF can easily use. SJ-ODF-12 fiber ODF, ODF 12 core is used to distribute the optical fibers from the distribution frame to the ends that have an optical connector such as patch panels, device and service termination cabinets, or cross-connections. ODF-IW12B consists of cold-roll steel box, splicing unit, distribution unit and panel. Its special design ensures the excess fiber cords and pigtails in good order, no. Generally, the ODF unit box is a necessary part of the indoor optical distribution frame. the extension piece is slip slot. you can choose many types panels (FC, SC, ST, LC type adapter's panel).
