

# MPO sector connector

## Overview

If you only remember one thing: MPO is a multi-fiber connector standardized under IEC 61754-7 that allows you to terminate 8, 12, 16, 24, or even 32 fibers in a single rectangular ferrule. Instead of plugging 12 separate LC duplex connectors, you can mate one MPO. As traffic surges to 100G, 400G, and even 800G, single-fiber connectors like LC or SC struggle to keep up with density requirements. Higher fiber counts. FSG provides a complete range of MT/MPO products from MT ferrules and MPO connectors to MPO cables, breakout cables, 48-336F data center cables and custom solutions for high density networks. 12F, 16F, 24F, 32F, 36F, and 48F MT ferrules available, including custom designs for different. The MTP /MPO is a low-loss multifibre connector with a maximum of up to 72 fibres, based on n x 12-fiber MT ferrules, with cable ports and bend protection for round cables.
