

Mobile fiber optic router out of power

Overview

When your router disconnects after a power outage, first try these quick fixes: Restart the router by turning it off, waiting 30 seconds, then turning it back on. Check all cables to ensure they are securely connected. Reset the modem and router if restarting doesn't help. But if you have the right backup internet power solutions, you can stay connected for hours, even during an extended fiber internet power outage. From fiber ONT battery backup to portable power stations, here's how to protect your WiFi, keep WiFi on during outage situations, and get storm-ready for. The easiest way to stay online during a power outage is to use your mobile phone, either as a Wi-Fi hotspot or by accessing the internet directly on your phone. You may also be able to maintain an internet connection during a power outage by using a generator to power your modem or internet. The good news is, your internet service is likely still active; it's just your modem and router that have lost power. Don't add high-draw stuff "just because it fits.
