Overview

Overhead Ground Wire Central Loose Tube 128 Core Single Mode Optical Fiber Composite Opgw Cable OPGW Mainly used for power communication with accessories, relay protection, automatic transmission, installation together with high-voltage lines. Connector Kits are assembled based on the OPGW cable that is being utilized. Both a download clamp (FDOA-XXYY; sold. umber of over-head line applications for the transmission of information. We have been developing fittings for fib data transmission in such cables takes place via modulated. OPGW is mainly applied in communication line of newly constructed high voltage transmit electricity system with 35 KV or above, or replacement of existing ground wire of previous overhead high voltage transmit electricity system, adding of communication lines and conduction of short-circuit current. ficing corrosion resistance. Because of this, OPGW contains exposed elements made of both. Optical Ground Wire (OPGW) cables are advanced composite overhead conductors that combine the functions of a ground wire and optical fiber communication within a single integrated solution. The central stainless steel tube is surrounded by single.
