

Power Strip PDU Smart

Overview

This PDU is a rack-mounted smart precision power distribution unit that tracks data center conditions in real-time, and also allows for automatic power cycling or disabling of outlets to reduce current draw when connected equipment stops responding. We focused on industrial-grade USB HUB and smart PDU cabinet strips. Based on the innovative SUM. High Accuracy Measurement - The industrial grade switched PDU adopts high-precision sampling circuit which can accurately measure voltage and amperage etc., the fault tolerance is less than 0. Equipped with Multi-function Ports - The 1U PDU provides 2 RJ45 and 2 RJ11 ports. In the era of increasing complexity of data centers and the continuous pursuit of operational efficiency optimization, DIGITUS® Smart PDU solutions are key to advanced energy management. The range consists of four models offering various levels of power monitoring and power switching features, and can be manufactured as single, dual or 3-Phase with a choice of socket types and mains lead. This intelligent power distribution unit (PDU) remotely manages and controls the power supply of up to 4 devices via TCP/IP and network connection. Ideal for remote control and management of electrical equipment, whether commercial, residential or industrial. Whether you're managing a small business network closet or an enterprise-grade server infrastructure.
