FTTH indoor cable because of Fiber Type Singlemode G. 657A has a much greater bandwidth to carry data and is less susceptible to interference than common indoor fiber cables because of the flexibility of Singlemode G. 657A1 bendable characteristics. With small diameter, water-resistant, non-metallic. Small diameter, light weight and strong practicability; 2. the structure is simple and reasonable, and has good compressive, tensile and anti-aging properties. The '8' groove design is easy to peel off the sheath and simplify installation and maintenance; 4. The name comes from the cross-section: a flat, wing-shaped profile with the optical fiber sitting in the center and two parallel strength members flanking it on either side. Featuring a durable construction with 3 steel wires for added strength, this low smoke halogen-free (LSHF) cable ensures safety and.
