

Setting up a fiber-to-the-home information box

Overview

If your ISP doesn't require a technician to set up your connection, these are the steps to self-install fiber internet: Locate your fiber network terminal. Connect the fiber terminal to the network box. Connect your device to the network. If you use the FRITZ!Box with a fiber optic modem, you can also use it on a fiber optic connection (Fiber to the Home, FTTH). Since the FRITZ!Box establishes and controls its own internet connection, all FRITZ!Box functions (such as the firewall, parental controls, MyFRITZ!) are also. Fiber internet installation delivers the high-speed connectivity modern businesses need for video conferencing, cloud applications, and data-intensive operations. This guide walks you through the complete fiber installation process, from checking availability to optimizing your Wi-Fi network. There are different ways of installing fibre broadband, depending on what kind of property you live in or whether there's an Openreach modem already installed. An Openreach modem is a white box that looks something like this: We'll let you know which scenario applies to you when you place your order. To establish an internet connection via your fiber optic connection (Fiber to the Home, FTTH), connect the FRITZ!Box to the fiber optic connection and enter your account information in the FRITZ!Box user interface.
