

# Sudanese optical cable

## Overview

Sudatel provides fixed-line services throughout the Sudan and has recently launched a major capital expansion program involving the installation of some 5,000 km of fiber optic cable, the transition from analogue to digital services, and the introduction of digital satellite. Sudatel provides fixed-line services throughout the Sudan and has recently launched a major capital expansion program involving the installation of some 5,000 km of fiber optic cable, the transition from analogue to digital services, and the introduction of digital satellite. At Canar, we are at the forefront of advanced telecommunications, delivering cutting-edge solutions that bridge local and international clients with reliable, high-performance connectivity. Our extensive infrastructure combines submarine cables, satellite systems, and a robust fiber optic network. Sudan's telecommunications infrastructure is set for a major transformation following a \$3 million investment in advanced networking equipment and the activation of a new undersea fibre optic cable. This development is particularly significant. The Sudanese optical fiber cables market soared to \$X in 2025, rising by X% against the previous year. This figure reflects the total revenues of producers and importers (excluding logistics costs, retail marketing costs, and retailers' margins, which will be included in the final consumer price). 49% in 2025, growth softens to -15.
