

Swiss Optical Cable Project

Overview

With an annual investment of around 1.7 billion, Swisscom will enable almost the entire population of Switzerland to access the fibre optic network by 2035. This will also allow the copper network to be switched off and electricity consumption to be significantly reduced. To improve the coverage, SFN is a network consortium consisting of numerous utility providers which have constructed local fibre networks, offers service providers who do not have their own access network (e. ch, GGA Maur, Salt, Sunrise and VTX) the possibility of sourcing uniform FTTH products. Espoo, Finland - Swisscom and Nokia today announced the successful completion of Swisscom's nationwide Next Evolution Wavelength Transport Optical Network (NEWTON) and the official start of service migration to the modernized network. Fast, uninterrupted Internet, digital television in top quality, and a reliable home office setup - optical fibre makes all this possible. On behalf of Swisscom, cablex brings this pioneering technology directly to your. With the optical fibre expansion, your Internet connection will be switched from copper to optical fibre.

Article Content

Your switch to optical fibre | Swisscom

With the optical fibre expansion, your Internet connection will be switched from copper to optical fibre. Find out here how the switch will be carried out.

New fiber-optic cable project to link Israel with Saudi Arabia

New fiber-optic cable project to link Israel with Saudi Arabia Google's "Blue Raman" route across Israel, part of a larger internet infrastructure project

Swiss Fibre Net and Swiss FibreCo strengthen the expansion of FTTH ...

It connects the local fibre optic networks of its network partners to create a large-scale, homogeneous, and open "Swiss Fibre Net" and offers it to national telecommunications providers on

How the optical fibre expansion is progressing. | cablex.

Questions and answers. Who is financing the optical fibre expansion? Swisscom is investing around CHF 1.7 billion annually in the optical fibre expansion and will

Aurora submarine fiber optic cable installation projects

Baltic Offshore have completed all submarine fiber optical cable installations in Global Connects investment in a new digital highway, Aurora.

Swisscom and Nokia begin service migration to new high-capacity

The new optical network will transport all of Swisscom's fixed and wireless traffic from customer-provided equipment to metro access to the backbone, supporting client services from 1G to

Optical Link - the optical transport network for data | Swisscom

Swisscom Opticallink Services, your optical transport network in the gigabit range. Ideal for large data volumes and time-critical applications.

Top Fiber Optic Cable Manufacturing Companies in

Contrik AG is a prominent Swiss manufacturer that specializes in high-quality fiber optic cables, among other products. The company collaborates with external

RTE international joins forces with Swissgrid

RTE international joins Swissgrid in a feasibility study and the unwinding of a live Optical Ground Wire (OPGW). RTE international has provided

Swiss Fibre Net and Swiss FibreCo strengthen the expansion of FTTH ...

Swiss Fibre Net AG, present in the Swiss FTTH fibre optic market for over 10 years as a guarantor of infrastructure competition, will be active in the planning, construction, and operation of Fibre-to-the

Deployment of optical fibre in Switzerland

The deployment of optical fibre to businesses and households must respond to the challenge of tomorrow's information society. The term "Fibre To The Home" (FTTH) describes the

Your switch to optical fibre | Swisscom
