

The cable tray can't be moved

Overview

Select a cable tray segment or run, and do one or more of the following: On the Modify | Cable Trays tab, specify a command. On the Options Bar, specify cable tray options. At first I thought the angles were perhaps too much for the software to automatically connect but. This comprehensive guide investigates the most frequent wire management challenges faced in real-world setups and demonstrates how the correct cable tray accessories may address them. It also offers future-ready ideas, troubleshooting guidance, and useful suggestions to guarantee your cable systems. Steel cable trays provide a structured pathway to route, support and protect electrical cables and wiring. They come in various forms, including ladder trays, solid-bottom trays and wire mesh trays such as stainless steel wire cable trays. however, with current script I am able place support along cable trays, but it is not working for all cable trays within the project. I am attaching herewith my script. When I try to draw a new section from where the existing tray ends, it places the tray on a different axis instead of continuing along the wall.
