

# The cable tray is too full of cables

## Overview

Calculate cable tray sizing and fill capacity based on tray dimensions, cable diameter, number of cables, and maximum fill percentage per electrical code. Determine whether cables fit within safe fill limits. Cable tray is the preferred wiring method for industrial facilities, data centers, and large commercial buildings where routing dozens or hundreds of cables through individual conduits would be impractical and expensive. The Fire Marshal arrives and fails the inspection because you exceeded the 40% Fill Ratio. Use our **Cable Tray Fill Calculator** below to size your pathways correctly. Properly sizing your cable tray is critical for safety and compliance. Select Fill. In the US, the National Electrical Code does restrict how many cables can be placed in the cable trays or wireways. This code does not apply to all areas and I have seen a lot of older installations that did not follow it, especially in power plants and substations. As I recall, cables over a. Common hazards are exposed wires in walkways or in dangerous areas, lack of tray covers, and incorrect separation between high-voltage and signal cables.
