

What are the wires coming out of the distribution box called

Overview

Three wires (hot black, neutral white, and bare ground) can be seen exiting the left side of the enclosure running directly to a NEMA 5-15 electrical receptacle with a power cord plugged into it. The incoming bare, stranded ground wire can be seen near the bottom of the neutral. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. Distribution boards, often referred to as electrical panels or breaker boxes, serve as the nerve center of any electrical system. These essential components play a pivotal role in managing and distributing electrical power within a building or facility. It is the central electrical supply system of any. Once electricity flows through your meter, it heads straight for your breaker box (also known as the electrical panel or distribution board).
