

# What fiber optic cable offers the fastest internet speed

## Overview

Single-mode fiber optic cables are generally considered the fastest type of fiber optic cables. They offer higher bandwidth and lower signal attenuation, enabling faster data transmission over longer distances compared to multimode fiber optic cables. Some regional providers, like EPB in Chattanooga, TN, offer speeds all the way up to 10 Gbps, and multi-gig plans are available from most fiber internet providers. 0.2 petabits per second, fiber optic technology offers performance that traditional copper systems cannot match. Single-mode fibers are commonly used for. Fiber optic internet provides lightning fast speeds that allow you to get more done online, stream high quality video, game without lag, and connect dozens of devices without slowdowns. After extensive research, I've identified the 10 best fiber optic cables on the market this year that deliver. Most fiber providers offer plans with speeds of at least Gbps (1,000 Mbps), but this is by no means the limit to fiber technology.

## Article Content

Lumos | High-Speed Fiber Internet Provider in NC, VA

Lumos 100% Fiber Optic Internet offers the fastest Internet service in NC and VA. Learn how you can stay connected with Internet built for the future.

How Fast Is Fiber Internet? Test Your Fiber Speed
