

What is the Huawei S7706 core switch used for

Overview

The S7700 switches can function as aggregation or core switches in a campus network to provide wireless access, voice, video, and data services, helping enterprises build an integrated end-to-end network. The S7700 comes in the following models: S7703, S7703 PoE, S7706, S7706. The cards supported by a switch depend on the software version. The CMUs work in active/standby mode, and security, in addition to high-performance Layer 2 to Layer 4 switching services. The S7706 is a high-density modular chassis switch designed for enterprise-scale networks. The S7700 series uses Huawei's intelligent multi-layer switching technology to provide intelligent service optimization methods, such as MPLS VPN, traffic analysis.
